EDUCATION

West Craven High School **2009-2014**

Results below (GCSE Level, unless stated otherwise):

English Language:	B	Mathematics:	A
English Literature:	B	Graphics:	C
Science:	B	French:	C
Triple Science:	B	Business Studies:	B
Finance NVQ Level 1			

Burnley College **2014-2016**

A-level results below:

Business Studies:	C
Computing:	B
Mathematics:	B

Edge Hill University **2016-2020**

A BSc (Hons) in Computer Science- 2:2

During my time studying, I covered a range of different modules that helped to broaden my skillset- these include:

- Foundations of Computer Science
- Digital World- Information Systems, Design, Computer Architecture and Networks
- Programming
- Web Design and Development
- Databases
- Data Analytics
- Statistical Inference
- Object-Oriented Programming
- Complex Systems
- Mathematical Models
- Advanced Databases

As well as the listed modules, I completed a research and development project on the impact of social networks on social interaction. My project involved me creating a program that would allow the user to control the amount of time they spend using social

media; along with this, I carried out an investigation and gathered a variety of different information and opinions from a large number of participants.

EXPERIENCE

Bartender/ Manager

The Strategy, Barnoldswick, Lancashire

2014-2016

McCullough's Irish Bar, Barnoldswick, Lancashire

2016-2020

Starting off as a bartender at the age of 17, I quickly gained the trust of my employers and was given many responsibilities at the age of 18- these included opening and closing the premises, handling the cashing up and till floating procedures, managing stock, supervising and training other members of staff and programming the TouchOffice tills. As a sociable person, being given the opportunity to interact with suppliers and 100's of customers daily was both beneficial for the businesses and myself.

SUMMARY

I am a very enthusiastic, outgoing and hard-working individual with a natural talent for mathematics. I take pride in the work I produce and believe that I have very good attention for detail. Creating and maintaining strong relationships with fellow peers (and higher-ups) is important to me, it proves very beneficial when communicating with and working as a part of a team.

With my background in computer science, and databases in particular- I can navigate a desktop and its accompanying software with ease but still look forward to being challenged in all areas when the opportunity presents itself.

Thank you very much for taking your time to read, I look forward to hearing back from you.

Kind Regards,

Callum.
