*I feel that I am a hardworking individual
who strives to do my best in all I do.*

Experience:

Rolls Royce PLC:

This was a two week work experience placement in high school,
This placement gave me an insight into the career that I wanted.
Here I worked a variety of jobs such as:

- Assembly work in fitting.
- VTL CNC operations.
- CNC milling.
- Manual machining.
- Tool forming.

After this placement I knew this is the type of work environment for me.

T & R precision engineering ltd:

2012-2017.

I served my apprenticeship and qualified as an engineer.

I have learned many valuable skills in this job and apprenticeship such as:

- CNC setting and operation. With fanuc and mazak machines.
- Manual machining, milling and turning.
- Project development. - Auto CAD and CAM software.
- ISO programming.
- Draftsmanship.
- Following good health and safety practices.

My job title was : CNC setter/operator & Toolmaker.

- I have a strong background in manual machining, making fixtures and tooling for this company as well as precision components.
- Diverse range of CNC machines used either fanuc and mazatrol. - Multi axis CNC milling and mill/turn machines.
- Development of programs and components.

Non engineering roles:

Since 2017 I have explored various roles in different fields of work.

And have taken time for personal development & education.

- Freelance Web designer using Linux,Apache,PHP
- Freelance 3D design using blender software for 3d meshes and renders for products.
- Chefs assistant & venue events host.
- A student of CXL institute, learning conversion rate optimization for improving websites using research analysis and testing.

Education:

Park High School, Colne :-

English Language - C

Maths - C

Science (double award) - B,B

French - B

I.C.T - C

R.E - C

Geography - B

Nelson and Colne College (school links program):

First Diploma in Engineering - Distinction

T & R Precision engineering apprenticeship
with Nelson and Colne College.

Engineering level 3 extended diploma in mechanical engineering and
manufacturing processes. - Merit

A little about me:

My interest in engineering originally came from my dad who has worked for Rolls Royce for more than 40 years, now retired.

When I was in my late teens my father and I volunteered on the keighley and worth valley railway on the locomotive maintenance and repair crew.

Here I learnt manual skills necessary for maintenance of steam locomotives.

I was involved in scouting for many years, within scouting I have been able to improve many skills needed in life and even had the opportunity to represent my England in the international jamboree In 2011 .

Scouting helped develop skills in team work and communication.
